## PROFESSIONAL SUMMARY

Senior frontend and product-minded engineer with 7+ years building production React and Next.js applications, design systems, growth surfaces, and complex user flows. Strong in TypeScript, UI architecture, and translating ambiguous product direction into polished shipped software. Especially effective in high-ownership environments where engineering, design, product thinking, and execution overlap.

## WORK EXPERIENCE

### Senior Frontend Engineer | Burnt XION

2024 – Present | Remote

- Own frontend architecture and product UX as the primary frontend and design partner for XION applications
- Built complex authentication and chain abstraction flows that reduce Web3 complexity for mainstream users
- Developed shared UI patterns and design-system foundations with Next.js and Tailwind CSS
- Partner directly with leadership to turn ambiguous requirements into shipped user-facing features

### Senior Frontend Engineer | Gummi

2024 (Contract) | Remote

- Built a DeFi trading platform with Next.js, TradingView charts, and real-time market data
- Implemented complex client-state and data flows for portfolio tracking, PnL leaderboards, and order execution
- Shipped polished product experiences in a fast-moving startup environment with high ownership and limited hand-holding

### Frontend Software Engineer | Terraform Labs

2022 – 2024 | Remote

- Built Station wallet experiences used by 300,000+ active users with 99.9% uptime across webapp and browser extension surfaces
- Implemented secure transaction flows processing \$10M+ daily volume across the Terra ecosystem
- Built Station UI, a 120+ component library with design tokens, theming, and Storybook documentation
- Increased wallet activation rates by 40% through onboarding optimization and data-driven iteration

### Full Stack Software Engineer | Verb Inc.

2019 – 2022 | Remote

- Led development of a React application serving 30,000+ users, achieving a 4.5/5 user satisfaction rating
- Integrated a shared design system across 2,000+ files, improving UI consistency by 60%
- Implemented an A/B testing framework that increased user engagement by 25%
- Improved application performance, reducing load times by 40%

## PROJECTS

### PepStack - Growth Product, Calculators, and Conversion-Focused Site - pepstack.io

Next.js 15, TypeScript, Tailwind CSS, Supabase, Stripe, Resend, PostHog

- Built a full-stack product and marketing site with 42 pages, calculators, analytics, auth, payments, and SEO-aware architecture
- Shipped from zero to production in one week, demonstrating fast execution across product, design, engineering, and growth concerns

### Station UI - Open-Source Design System & Component Library - Storybook

React, TypeScript, Storybook, Design Tokens, Accessibility

- Built a 120+ component library used across the Terra ecosystem, bridging design consistency and engineering speed

## TECHNICAL SKILLS

**Frontend:** React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Storybook

**Product:** UI Architecture, Design Systems, Growth Surfaces, Experimentation, Responsive Design, Performance Optimization

**Backend:** Node.js, Supabase (PostgreSQL), REST APIs, GraphQL, Stripe, WebSockets

**Tools:** Figma, Git, Vercel, PostHog, Claude Code, Cursor, Jest, CI/CD

## EDUCATION

Hack Reactor - Advanced Programming Immersive

2018
